

ANNEX-D

Specification of No Plates

- 1) Retro reflective Material:
 - Retro-reflective foil shall be applied on the Aluminum (98% pure aluminum) sheets with flat and smooth edges.
 - Resistance against temperature, water, humidity impacts and bending etc.
 - Rounded border edges and corners in order to avoid injuries during fixing.
 - Border of the Number Plates shall be embossed.
 - At least 1 mm (+/-) 0.02 mm thickness of all types of blank registration plates.
 - Alpha-numeric characters are embossed on number plates.
- 2) Specific Graphical Logo on left side of the plate.
- 3) Uniquely identified Laser Serial Numbers:
 - a) Registration plates are market with a unique laser serial no consisting of at least 6-7 digits.
 - b) Laser number cannot be removed from the reflective sheet unless to destroy it.
- 5) The plates should be readable in reflection of light during dark hours due to the usage of Retro Reflective material.
- 6) Alphabets and Numerals should be embossed not printed.
